

Résultats du recensement 2009

Chiffres clés pour l'Aire urbaine et le Pays de Montbéliard

note

Les résultats détaillés du recensement 2009 de l'INSEE sont connus depuis fin juin 2012. L'Agence de Développement et d'Urbanisme du Pays de Montbéliard en a extrait les principaux chiffres clés pour l'Aire urbaine en collaboration avec l'Agence d'Urbanisme du Territoire de Belfort.

Population

L'Aire urbaine a gagné 0,2% d'habitants supplémentaires par an entre 1999 et 2009. Cette croissance de population est exclusivement due au solde naturel (+0,5%/an), le solde migratoire restant légèrement négatif (-0,3%/an) contrairement au niveau régional où le solde migratoire est désormais positif (+0,1%/an).

Comme partout ailleurs, la population vieillit : les plus de 60 ans représentent désormais 23% de la population contre 19% en 1999 et 22% au niveau national.

La taille des ménages continue de se réduire passant de 2,5 à 2,3 personnes par ménage, à l'instar des moyennes nationale et régionale. Les personnes seules représentent désormais le tiers des ménages.

Les célibataires (34% des plus de 15 ans) sont sous-représentés, contrairement aux personnes mariées (50%) et divorcées (8%).

Logement et conditions de vie des ménages

Le taux de vacance des logements passe de 5 à 7%, taux similaire au taux national. Les résidences secondaires et logements occasionnels ne représentent que 1% des logements contre 9% en France.

Les petits logements sont sous-représentés et la taille moyenne des logements tend à augmenter avec 5,1 pièces pour les maisons et 3,3 pièces pour les appartements.

Les locataires HLM sont moins nombreux (20% contre 22% en 1999), mais leur part reste supérieure au taux national (15%).

78% des logements sont équipés d'un chauffage central individuel ou collectif contre 60% en France, 12% d'un chauffage individuel électrique contre 26% en France.

Le taux de motorisation des ménages augmente légèrement pour s'établir à 84% des ménages qui disposent d'au moins une voiture (France : 80%).

Emploi, chômage et qualification de la main d'œuvre

Si la population des 15-64 ans a diminué, le nombre d'actifs se développe avec un taux d'activité qui passe de 68 à 71%.

Le taux de chômage au sens du recensement (déclaratif) s'élève à 13% en moyenne dans l'Aire urbaine mais il peut monter jusqu'à 24% à Béthoncourt.

L'emploi féminin passe de 41 à 45%, mais reste inférieur au niveau national (49%).

L'emploi tertiaire représente désormais les deux tiers de l'emploi contre 59% en 1999. Il reste néanmoins en retrait par rapport au niveau national (76%).

L'emploi intérimaire reste surreprésenté avec une part de 3% de l'emploi contre 2% au niveau national.

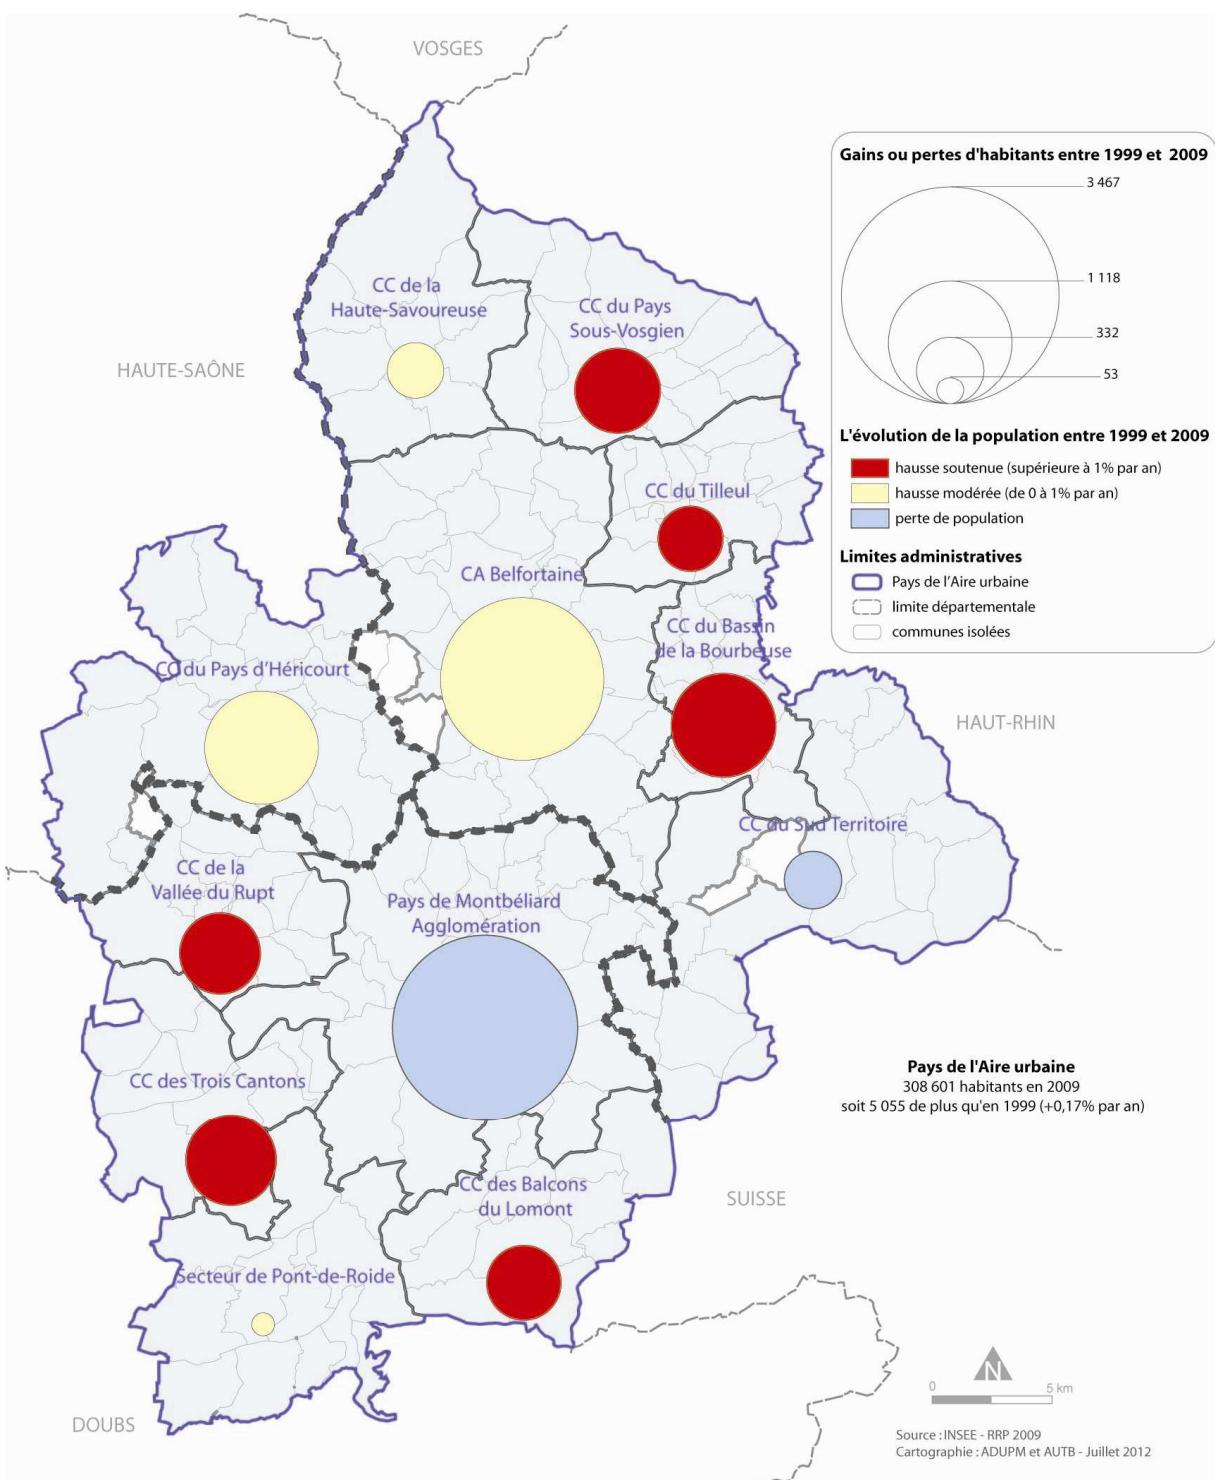

Les salariés sont très mobiles puisqu'ils sont 73% à travailler en dehors de leur commune de résidence, contre 65% en France. Ils sont désormais 17% à changer de département pour aller travailler contre 14% précédemment. Le nombre de frontaliers augmente de 45%.

Le taux de scolarisation des 18-24 ans baisse de 49% à 45%. Il est nettement inférieur au taux national (51%).

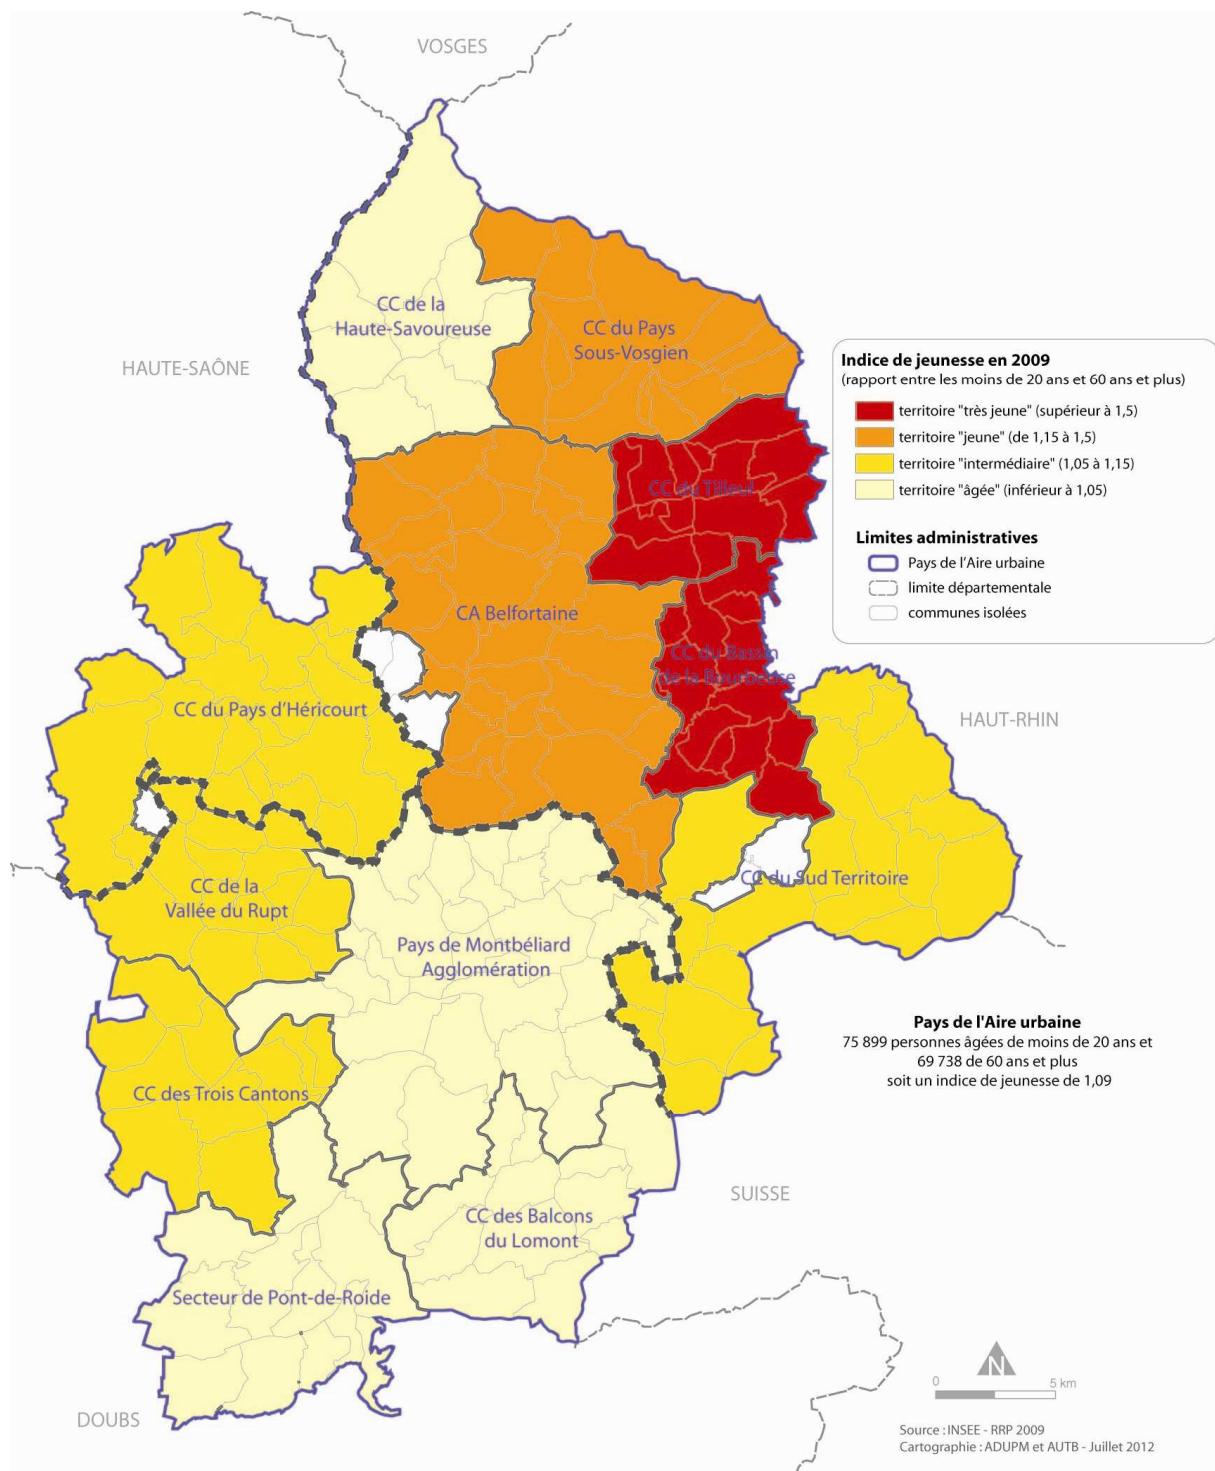

La part des non-diplômés (21%) diminue à peine et reste supérieure au taux national (19%). Celle des diplômés de l'enseignement supérieur (20%) reste inférieure au taux national (24%) malgré une augmentation de 6 points.

La proportion de cadres passe de 5 à 7% de la population, soit davantage qu'en Franche-Comté (6%), mais moins qu'en France (9%).
